**Product Name:**WeMos NodeMcu Base ESP8266 Testing DIY
Board For LoLin V3 For NodeMcu Lua

## Product Description:

1.This is a breadboard for the LOLIN NodeMCU Development Board
ESP8266-12E for Arduino IDE see other listing.

2.Please note this has a pin spacing of 28MM between the rows
unlike the unit made by DOIT witch is 23 MM.

3.This is compatible with the LOLIN NodeMCU not the DOIT device.
